

SPACE GEOTECHNICS, REGOLITH, AND GRANULAR MATERIALS

BUILDING THE MOON: Geotechnical Investigation, Design, Construction, and Resource Utilization

APRIL 19-23, 2027
San Diego, California, U.S.A.

HOSTED BY

SDSU | San Diego State University

Subject: Sponsorship Invitation: 2nd International Workshop on Space Geotechnics & Lunar Construction (April 2027)

Dear prospective partner/sponsor:

We are pleased to announce an exceptional scientific and engineering event: **The 2nd International Workshop on Space Geotechnics, Regolith, and Granular Materials**, taking place at San Diego State University from April 19–23, 2027.

Under the theme *"BUILDING THE MOON: Geotechnical Investigation, Design, Construction, and Resource Utilization,"* this international gathering brings together leading researchers, early-career professionals, educators, and industry practitioners from around the globe.

The technical program advances the critical science and engineering required to sustain infrastructure on the Moon and other planetary bodies. Core focus areas include subsurface characterization and surface operations, geotechnical design, construction and infrastructure performance, space resource utilization, as well as standards and workforce development for sustained exploration.

For organizations operating at the forefront of technological and engineering innovation, sponsoring this workshop offers direct visibility among key decision-makers, government agencies, academic leaders, and emerging talent in space infrastructure.

The event is organized under the auspices of prominent international bodies, including the ASCE/ASD Space Engineering and Construction Technical Committee, the ASCE/EMI Granular Materials Technical Committee, the ASCE/Geo-Institute Sustainability in Geotechnical Engineering Technical Committee, IRN GeoMech/CNRS (France), and ISSMGE TC310 Space Geotechnics.

Please review the sponsorship tiers and associated benefits summarized in the table below. Additional details and workshop updates can be found at iwsgrgm2027.sdsu.edu. We welcome your organization's support in making this international initiative a success and look forward to partnering with you.

Sincerely,

Organizing Committee
International Workshop on Space Geotechnics, Regolith, and Granular Materials
